TO: Minerals File

FROM: Tony Gallegos, Reclamation Engineer *adg*

RE: Site Inspection, Calcitron Resources Corporation, Red Arm 1 & 2, S/009/001, Daggett County, Utah

Inspection Date: October 3, 1991  
Inspection Time: ~ 1720 - 1800  
Conditions: Fair, warm  
Participants: Tony Gallegos, DOGM

Division records currently list this mine as suspended. The permit was approved by the Division in April 1988. Surface and mineral rights are held by the BLM. The BLM required a more detailed plan of operations than that contained in the Division Notice of Intent (NOI) for small mines. No site inspection had been performed by Division personnel up to this date. The request to the operator for a 1989 annual report was returned to the Division undelivered due to the recipient moving with no forwarding address. The operator's phone number was disconnected or no longer in service when an attempt at calling was made on July 17, 1991 by the Division.

The purpose of this inspection was to verify the inactive status of the mine site. The general area described by the NOI was examined and photographs of the general vicinity were taken. No signs of an active mining operation were visible. Pending verification by the BLM, this mine may be changed to inactive status (it seems it was never initiated) and the file retired.
